

Quiz Time!

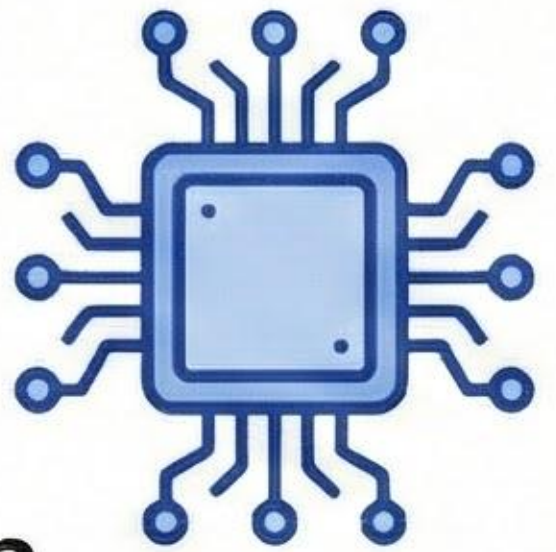

Is That a **Robot** or a **Person**?

Question 1:

Chip explained that AI stands for “Artificial Intelligence.” What is AI?

- A) A real person hiding inside your computer.
- B) A computer program that can learn and talk like a human.
- C) A magic spell that makes homework disappear.

Correct Answer: **B**

Why? Chip says AI is a tool that can do cool things like help write or play games, but it isn't a real person.

Question 2: Even though AI might sound friendly and chatty, what should you remember about it?

- A) It has feelings just like you.
- B) It is a tool, not a friend, so you shouldn't share secrets.
- C) It gets lonely if you don't talk to it.

Correct Answer: B

Why? Chip reminded us that robots don't have feelings and they don't care like people do. Keep your personal info safe!

Question 3: If an AI tells you an answer, what does Chip suggest you do next?

- A) Believe it immediately because computers are smart.
- B) Use it to cheat on your test.
- C) Check to make sure it's true, because AI can make mistakes.

Correct Answer: C

**Why? “Double-check what it says!”
Chip says AI can get things wrong,
so use your own squirrel smarts to
verify the info.**
